

A

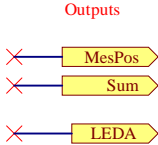

B

Empty schematic sheet... You will find only the "Ports" needed to be compatible with the rest of the schematic...

You have to realize the schematic with your components and your ideas :)

Maybe you will have to create new components wich would not yet exist in the library "Balance.SchLib"

C

Don't forget !
Don't move to the PCB before :
- all schematic components have their footprint
- no error when compiling

D
